

A Bright Idea!

Paper mills across North America have increased the brightness standard of their basic copy papers from the traditional 84 bright to an improved level of 92.

Grand & Toy is leading this change with our own line of private-label papers and our wide selection of national brands. Get the highest quality standard papers available - at the same low prices.

What does this mean for you?

Ultimately better paper! More businesses are using colour technology for printing, copying and scanning than ever before. The use of brighter, whiter paper:

- **Makes colours more vibrant**
- **Increases contrast**
- **Provides a more professional appearance for your documents**
- **Adds impact to presentations**

For more information on Grand & Toy's new, brighter papers contact Brian Houston at:
